## Summary

A highly motivated Computer Science undergraduate with an 8.90 CGPA and foundational programming experience in Java, C++, and Python. Possesses a solid academic understanding of the Software Development Life Cycle (SDLC), Agile methodologies, and enterprise architecture. Demonstrates excellent problem-solving capabilities through the development of secure applications, scalable web solutions, and REST API integrations, eager to leverage backend skills in a collaborative technical environment.

## Education

**Vellore Institute of Technology (VIT), Bhopal**

Expected: May 2027

- Bachelor of Technology in Computer Science | CGPA: **8.90 / 10.0**
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

## Technical Skills

**Languages:** Java, Python, C++, JavaScript, SQL

**Frameworks & Libraries:** Spring, React.js, Node.js, Express.js, JavaFX

**Databases & Systems:** SQL (H2, Relational Databases), MongoDB, Apache Kafka

**Tools & Methodologies:** REST APIs, Git, GitHub, Maven, VS Code, SDLC, Agile Methodologies

## Experience

**Software Engineering Virtual Experience** | Forage

March 2026

- Engineered a high-stakes backend project, integrating a Spring application with an external REST API to facilitate seamless and secure data transmission.
- Integrated Apache Kafka for scalable message streaming and an H2 relational database, directly aligning with enterprise data management and resiliency practices.
- Exposed robust REST APIs within the Spring ecosystem, demonstrating proficiency in developing large-scale technology solutions for dynamic environments.

## Projects

**Command-Line File Encryptor** | Java, JCA (AES), Maven, Git

- Architected a command-line utility in Java to perform robust, byte-level file encryption and decryption on any file type using the AES-128 algorithm, directly adhering to software security best practices.
- Implemented cryptographic operations using the Java Cryptography Architecture (JCA) and managed secure data handling with Java's native file I/O streams.

**Gramin Seva - Rural Complaint Portal** | React 18, Node.js, MongoDB, REST APIs

- Collaborated in a team environment to develop a full-stack citizen portal, creating an intuitive frontend interface for complaint registration and real-time status tracking.
- Interpreted design representations to engineer a scalable backend using Node.js and MongoDB, handling API data transmission and unstructured data storage.
- Built a responsive user interface supporting 8+ regional languages to bridge the digital divide, adhering to agile practices for continuous module iteration.

## Extracurricular Activity

**Core Member, Graphics & Videography** | AI Club

VIT Bhopal University

- Collaborated within a team framework to create visual content for club events, enhancing communication and managing competing priorities under tight deadlines.

## Certifications

- OCI Certified GenAI Professional 2025 | **Oracle**
- Crash Course on Python | **Google**
- MongoDB Certified Associate Developer (Node.js) | **MongoDB**
