SUMMARY

Detail-oriented Computer Science undergraduate (9.06 CGPA) with a robust foundation in core computer science concepts, data structures, and algorithms. Experienced in driving applications through the complete Software Development Life Cycle (SDLC)—from architecture design to scalable deployment. Eager to apply strong analytical problem-solving skills and full-stack engineering expertise to build secure, efficient software solutions in a dynamic, collaborative environment.

EDUCATION

Vellore Institute of Technology (VIT)

Expected: May 2027

Bachelor of Technology in Computer Science — CGPA: 9.06 / 10.0

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Linear Algebra, Probability & Statistics

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, JavaScript

Cloud & Systems: Oracle Cloud Infrastructure (OCI GenAI), REST APIs, Git, Linux, Docker, AWS (S3, SQS)

Web Frameworks: React.js, Node.js, Express.js

CERTIFICATIONS

- **OCI Certified GenAI Professional 2025** — Oracle
- **Crash Course on Python** — Google
- **MongoDB Certified Associate Developer (Node.js)** — MongoDB

PROJECTS

DocuMind — AI-Powered Document Intelligence — documind.sarthaksb.me — *Node.js, React, AWS, MongoDB*

- Architected a full-stack RAG pipeline for context-aware Q&A, integrating AWS S3, SQS, and decoupled Lambda functions for asynchronous PDF text extraction and chunking.
- Implemented vector semantic search using ChromaDB Cloud and Gemini embeddings, persisting conversation history in MongoDB Atlas.
- Containerized the backend with Docker and built a secure REST API (JWT, rate-limiting), deployed alongside a React/Vite frontend featuring real-time status polling.

NeuroBlitz — Cognitive Training Web Platform — neuroblitz.sarthaksb.me — *React, Node.js, Express, MongoDB*

- Developed a full-stack cognitive training platform featuring 5 interactive games with adaptive difficulty systems, utilizing React, Vite, and React Router.
- Engineered a seamless guest-to-authenticated user flow with localStorage-to-database synchronization for persistent score tracking across devices.
- Designed an engaging UI with custom CSS animations and successfully deployed via a decoupled architecture (Vercel/Render) with secure cross-origin requests.

Command-Line File Encryptor — *Java, JCA (AES), Maven*

- Developed a secure command-line utility executing robust, byte-level encryption and decryption utilizing the AES-128 algorithm.
- Integrated the Java Cryptography Architecture (JCA) to ensure stringent cryptographic operations and secure data handling via native I/O streams.

EXTRACURRICULAR ACTIVITY

Core Member, AI Club (Graphics & Videography) — *VIT Bhopal University*

- Collaborated within a cross-functional team to conceptualize and produce compelling AI-assisted visual content for university-wide technical events.
