Summary

A highly motivated Computer Science undergraduate (8.93 CGPA) with a strong foundation in full-stack web development, including the PERN stack, and enterprise architecture. Adept at leveraging Agile methodologies and the Software Development Life Cycle (SDLC) to engineer secure applications, scalable web solutions, and robust REST APIs. Eager to apply advanced problem-solving skills and technical expertise in a collaborative, fast-paced software engineering environment.

Education

Vellore Institute of Technology (VIT)

Expected: May 2027

- Bachelor of Technology in Computer Science | CGPA: **8.93 / 10.0**
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Technical Skills

Languages: Java, Python, C++, JavaScript, SQL

Frameworks & Libraries: React.js, Node.js, Express.js

Databases & Systems: PostgreSQL, MongoDB, SQL

Tools & Methodologies: REST APIs, Git, GitHub, VS Code, SDLC, Agile Methodologies

Projects

Ikshana - AI-Based Visual Aid | Python, Gemini API 

- Architected an AI-powered visual aid application leveraging the Gemini API to process and analyze real-time environmental visual inputs.
- Engineered seamless API integrations to deliver prompt, context-aware auditory feedback, significantly enhancing spatial accessibility for visually impaired users.

Gramin Seva - Rural Complaint Portal | React 18, Node.js, MongoDB, REST APIs 

- Spearheaded the development of a full-stack citizen portal, delivering an intuitive frontend for complaint registration and a real-time status tracking dashboard.
- Architected a highly scalable backend with Node.js and MongoDB to manage robust API data transmission and efficiently handle unstructured data storage.
- Built a responsive, inclusive user interface supporting 8+ regional languages to bridge the digital divide, adhering to Agile CI/CD practices for rapid module iteration.

Command-Line File Encryptor | Java, JCA (AES), Maven, Git 

- Developed a secure command-line utility in Java, executing robust, byte-level encryption and decryption across diverse file types utilizing the AES-128 algorithm.
- Integrated the Java Cryptography Architecture (JCA) to ensure stringent cryptographic operations and secure data handling via Java's native file I/O streams.

Extracurricular Activity

Core Member, Graphics & Videography | AI Club

VIT Bhopal University

- Collaborated within a cross-functional team to conceptualize and produce compelling visual content for university-wide club events.
- Streamlined project communication and managed competing priorities to consistently deliver high-quality assets under tight deadlines.

Certifications

- OCI Certified GenAI Professional 2025 | **Oracle**
- Crash Course on Python | **Google**
- MongoDB Certified Associate Developer (Node.js) | **MongoDB**
